

Press Room - Reports on EMF and Cell Phone Radiation Issues

Warning: Cell Phone Radiation May Be Dangerous to Your Health **Cell Phone Users are 240% More Prone to Brain Tumors**

Watch Australian News Report:
"Residents Fear Health Dangers
from High Tension Power Lines"

BROADBAND | DIALUP

Residents near Sydney staged a dramatic demonstration of EMF concerns by lighting up fluorescent lightbulbs - unplugged - underneath power lines. (*Sydney 7 News*)

New Zealand TV Interview
with Dr. George Carlo

BROADBAND | DIALUP

Dr. George Carlo, former chief scientist of the \$28 million research into cell phone safety, talks about his alarming findings. (*Campbell Live, TV3*)

Press Articles - EMF and Cell Phone Radiation issues:

- [Using Wi-fi has Cost Me My Life](#) (*Sunday Express-UK, August 5, 2007*)

Report on the symptoms of electrosensitivity and stories of victims who say their lives have been devastated by the effects of wireless technology.

- [Wi-Fi's Electric Shock](#) (*NOW Toronto News, March 15, 2006*)

According to stats, about 2 or 3 per cent of the population suffers from potentially debilitating electro-hypersensitivity, or EHS. Over a third of us are a little electro-sensitive and just don't know it.

- [Radiation Bureau Cautions Cordless Phone Users](#) (*M&C News, February 13, 2006*)

People who use cordless phones should keep their conversations to a minimum, Germany's federal bureau for radiation protection recommends.

- [New Cordless Phones Danger](#) (*News of the World, February 5, 2006*)

Having a cordless phone in your house can be 100 times more of a health risk than using a mobile, according to Swedish researchers.

- [Teddy Bear Mobile 'Puts 4-Year Olds at Risk from Radiation'](#) (*Telegraph News, November 29, 2005*)

A teddy bear-shaped mobile phone targeted towards four- to 10-year-olds was launched amidst concerns by experts about the potential hazards of radiation for children.

- [Distress Signals](#) (*Toronto Star, November 11, 2005*)

Another excellent report on electrosensitivity, or ES, an allergic reaction to electropollution that affects a few people out of a thousand. Expert suggests links to MS and diabetes..

- [Court Victory is a First for Cell Phone Programmers](#) (*Sun Sentinel, October 2, 2005*)

An administrative law judge who handles worker's compensation claims grants court victory to a woman who suffered a brain tumor while working as a cell phone programmer.

- [Electrical Fields Can Make You Sick](#) (*The Sunday Times-Britain, September 11, 2005*)

A British government agency has acknowledged for the first time that electrosensitivity, a heightened reaction to electrical energy, will be recognised as a physical impairment..

- [Cell Phone Radiation May Cause Visual Damage](#) (*IsraCast Technology News, July 29, 2005*)

A study conducted by Israeli researchers found a new link between microwave radiation and the development of cataracts.

- [Kids' Cellphone Use in Spotlight](#) (*Toronto Star, July 14, 2005*)

Public calls for greater caution around children's use of cellphones are emerging as scientists raise questions about the impact of radio frequencies on young heads and bodies.

- [Limit Cell Use: Health Officer](#) (*Toronto Star, July 12, 2005*)

Canada's top public health official (equivalent to US Surgeon General) urges caution regarding cell phone use in a WHO conference address.

- [Is Her Cellphone Safe?](#) (*Toronto Star, July 10, 2005*)

Some scientists complain about corporate interests meddling with science in getting the truth out about potential risks of cell phone use.

- [Kids at Risk?](#) (*Toronto Star, July 9, 2005*)

A close look at the potential long term impact of cell phone use, especially among children and teens. Concern raised regarding the wireless industry's marketing towards children..

- [Cell Phone Safety Lawsuits Revived](#) (*Internet News, Mar 18, 2005*)

A federal appeals court ruled cell phone makers could be sued in state court over claims that wireless equipment emits unsafe levels of radio frequency radiation.

- [The Cell Phone Industry: Big Tobacco 2.0?](#) (*CNET.com, Mar 8, 2005*)

Industry analysts know that any lawsuit that succeeds could start a domino effect of future lawsuits, which keeps the industry determined to maintain that the product is harmless, despite increasing evidence to the contrary.

- [Mobile Phones Tumour Risk to Young Children](#) (*London Times, Jan. 12, 2005*)

CHILDREN under the age of eight should not use mobile phones, parents were advised last night after an authoritative report linked heavy use to ear and brain tumours.

- [Mobile Phone Radiation Harms DNA, New Study Finds](#) (*Reuters, Dec. 20, 2004*)

Radio waves from mobile phones harm body cells and damage DNA in laboratory conditions, according to a new study majority-funded by the European Union.

- [Study Links Tumors to Cell Phone Use](#) (*Consumer Affairs, October 14, 2004*)

A study in the international journal *Epidemiology* finds that people who have used cell phones for at least 10 years may have an increased risk of developing a rare brain tumor.

- [Men and Mobiles: Calls to Take Caution](#) (*MSN, June 28, 2004*)

Mobile phones cut sperm count up to 30%, according to new research. Those who place their phone near their groin, or belt or in a pocket, are at greatest risk

- [Brain Tumours: the Silent Killer](#) (*MSN, June 7, 2004*)

A pre-eminent neurosurgeon in Australia looks at possible link between 21% increase in children's brain tumors and mobile phone use.

- [Mobile Users are Advised to Keep Their Calls Short](#) (*Evening Times London, April 30, 2004*) New health warning issued by health experts after being contacted by members of the public concerned about emissions from phones and masts

- [Fresh Fears over Cell Phones](#) (*Popular Science, February 2004*)

A Swedish study links mobile phones to brain damage in rats.

- [What Cell Phones Can Do To Youngster's Brain In 2 Minutes](#) (*U.K. Sunday Mirror, London, April 1, 2004*)

Scientists have discovered that a call lasting just 2 minutes can alter the natural electrical activity of a child's brain for up to an hour afterwards.

- [U.K. Gov. Bans Cell Phones in All Schools](#) (*The Sun, UK Press November 16, 2003*) TEACHERS have been ordered to ban their pupils from using their mobile phones amid rising safety fears.

- [Feds to Launch \\$10 million for Investigation into Cell Phones](#) (*Sun Sentinel Florida, November 16, 2003*)

The federal government is preparing to launch a multimillion dollar investigation into potential cancer-causing or toxic effects associated with the phones.

- [Mobile Phones 'May Trigger Alzheimer's'](#) (*BBC News, Feb 5, 2003*)

Mobile phones damage key brain cells and could trigger the early onset of Alzheimer's disease, a study suggests.

- [Cell Phone Radiation, a Nagging Concern](#) (*The Toronto Star*, May 27, 2002)

If Nokia can spend huge amounts of money developing colour browsers and long-lasting batteries, why not tackle the radiation issue?

- [How Cell Phones Cause Cancer](#) (*ZDNet UK*, June 25, 2001)

Researchers in Australia hypothesize that mobile phone frequencies well below current safety levels could stress cells in a way that has been shown to increase susceptibility to cancer

- [Cell Makers Eye Device as Radiation Protection](#) (*New York Post*, June 12, 2001)

The worlds big three cell-phone makers quietly have been working on protective devices to reduce the amount of radiation absorbed by the brain.

- [Scientists Link Eye Cancer to Mobile Phone](#) (*The Sunday Times: News*, January 14 2001)

Mobile phones have been linked to human cancer in a scientific study for the first time. The research suggests there is a threefold increase in eye cancers among people who regularly use the devices.

- [Hands-Free Mobile Phones "Emit More Radiation"](#) (*Yahoo.News (UK&Ireland)*, April, 2000)

According to new research, some hands-free kits for mobile phones can increase radiation exposure to the brain by up to three times!
