

Takara Detox Foot Patch™

Ingredients

After 26 years of research and development, it was discovered that through a unique and powerful concoction of natural ingredients, they could be blended to form a powerful detoxifying product. The Takara Patch formula is unique on the marketplace, with a time-tested blending of the following 100% natural ingredients in their optimum ratios for maximum effectiveness. Simply no other patch can compare!

100% natural, blended for the maximum effectiveness...

Contains absolutely NO chemicals, synthetic ingredients, or additives!

NO potentially harmful or irritant ingredients (eg. sorbitol, glycolic acid)!

Containing absolutely NO fillers or unnecessary ingredients!

The non-foil backing of the patches ensures the absolute purity, potency, and effectiveness of the ingredients; to maximize your cleansing experience.

GMP Certified Manufacturing and FDA approved.

Bamboo Vinegar

Its unique herbal properties include the unparalleled ability to assist in the discharge of undesired waste matter from the human body through the skin. The composition of bamboo sap is rich in minerals and trace elements, and its ability to assist in detoxification simply cannot be over-emphasized.

Wood Vinegar

Wood vinegar, or pyroligneous acid, is the fluid or sap derived from tree cells, which exhibits exceptional permeability and sterilizing properties. During experiments, it was confirmed that the great drawing power of the wood vinegar makes it the powerful choice to be used in physiotherapy, for minor pain relief and to decrease swelling in the body.

Tourmaline

Tourmaline is a semi-precious stone and mineral that emits negative ions and far-infrared rays (FIR). It is known to be helpful for improving circulation, relieving stress, increasing mental alertness and strengthening the immune system function. The energy produced by this mineral have been shown to increase circulation and metabolism on a molecular level in the body, allowing for expansion of the cell walls and the transfer of toxins and waste across these membranes into the surrounding blood and lymph systems.

Eucalyptus

The Eucalyptus plant is probably the most powerful antiseptic of its class, especially when it is old, as ozone is formed in it on exposure to the air. It has decided disinfectant action, destroying unhealthy flora and microbes.

Agaricus Mushroom

Agaricus blazei murill is a mushroom that originated in the rain forests of Brazil. The mushroom thrives in certain tropical areas of China, and the Chinese have become the premier growers of Agaricus for the world. Several studies have documented this mushroom's ability to activate and stimulate various components of the immune system.

Chitosan

Chitosan is derived from chitin, the main fiber component of crustacean shells. It has powerful unique absorption abilities; which aids in the effectiveness of the patch by isolating fatty tissue and assisting in dispelling it out of the body.

Cornstarch

Used as a complimentary ingredient within the patch due to its excellent liquid absorption abilities; absolutely essential in helping to bind the extracted toxins in the patch, preventing re-absorption back through the skin.

The proof is in the results...
