

Solution#1:

The *MRET*-powered Cell Chip

For Cell Phones, Bluetooth, and PDAs

The Cell Chip is a revolutionary safeguard against cell phone radiation that incorporates TWO powerful scientifically validated technologies: MRET (Molecular Resonance Effect Technology) and ERT (Energy Resonance Technology). MRET, a patented noise-field nanotechnology developed by a Russian scientist, prevents adverse cell response by superimposing “noise-field” on bio-affecting EMR (electromagnetic radiation). This noise-field is composed of electromagnetic oscillations of low frequencies that resemble frequencies of living cells in the body. This makes the EMR no longer a foreign toxin and allows the cells to function normally.

ERT is a proprietary subtle physics technology that reduces effects of EMR by restoring and maintaining intercellular communications that are otherwise disrupted by EMR exposure. The technology was developed from the cumulative knowledge of scientific pioneers such as Samuel Hahnemann, Wilhelm Reich, Nicola Tesla, Winfried Otto Schumann, George Lakhowski, Fritz Popp, Alexander Lowen and others. The technology uniquely connects core principles in the fields of bioenergetics, quantum physics and molecular biology.

In addition to the Cell Phone Chip – which attaches to the outside of the phone, next to the phone’s antenna – we offer a device that fits “inside” the phone. Many people choose this option, since there is no danger of losing it. **Green 8** is a product which is very easy to install and easy to use. We have found in the past few years that thousands of satisfied people have been using this product. Once you install it you will notice less heat from your mobile / cell phone on long calls.

The radiation from your cell phone will be instantly transformed when you install it in the battery compartment of your cell phone (as shown in the photo). Unlike all of our competitors, you will never lose your **Green 8** once you install it. Why? It fits inside the battery compartment – unlike others which stick on the outside. Most electro-sensitive persons prefer the **Green 8**.

. . . Order your **Green 8** by clicking on the image.

\$39.95 each (plus tax & shipping)

The **Green 8 Technology** extends to other products to protect Laptop and DeskTop Computers, TVs, Cordless Phones, Microwaves, as well as Entire Home Systems to provide protection from overhead powerlines, cell phone towers, etc. [Click Here to receive information on all our EMF Reduction products.](#)

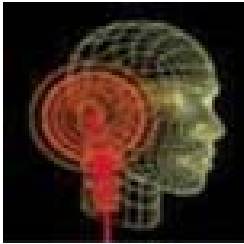

Solution#2:

The Air-Tube Hands-Free Mobile Phone System

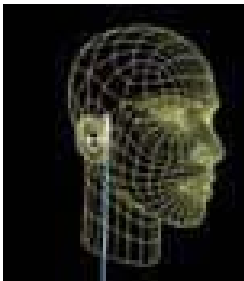

The Only Headset that Stops EMF Radiation In Its Tracks!

The **Air-tube Hands-Free Headset** keeps radiation away from the head by using a hollow “air-tube” to transmit sound from a speaker located at a distance from the head. Tube and earpiece contain no metal conductors; therefore, virtually eliminating any radiation otherwise present in conventional hands-free units.

Conventional Headsets use wire to deliver sound to the earpiece and may also deliver electromagnetic radiation directly into your head and brain.

The **Air-Tube Hands-Free Headset** delivers crystal clear sound through an air-filled wireless tube, which reduces the possibility of radiation reaching your head.

Tests by accredited laboratories show that using the Air-tube Hands-Free Headset helps reduce Electromagnetic radiation.

Protect Yourself from ElectroMagnetic Radiation . . . Anytime – Anywhere You Go!

. . . To Purchase the BlueTube Hands-Free Cell Phone Headset –
\$39.95 each (plus tax & shipping)

Patented MRET-Shield technology has been scientifically proven to neutralize the dangers of electrommagnetic radiation (EMR) from cell phones and other electronic devices.
