

A Product for Our Times

The development of VIBE™ has been years in the making. The pioneer of water-soluble nutrient delivery technology - the Eniva Corporation - offers VIBE as the benchmark by which other liquid nutritional supplements are measured. The success of the company's line of potent, water-soluble nutrients has helped millions of people and has laid the foundation for the development of VIBE.

VIBE™ is listed in the PDR (Physicians' Desk Reference) as having the highest certified Oxygen Radical Absorbance Capacity (ORAC) rating.

This summary is designed to display the various *Oxygen Radical Absorbance Capacity (ORAC)* of several commonly purchased nutritional supplements. The ORAC score is a definitive test for assessing the antioxidant strength of potential antioxidant compounds. The higher the score, the stronger the antioxidant capability of the compound.

Studies at the Jean Mayer USDA Human Nutrition Research Center on Aging at Tufts University in Boston suggest that consuming fruits and vegetables with a high-ORAC value may help slow the aging process in both body and brain. One "serving" of fresh fruits and vegetables has been given an ORAC value of 800. One "serving" (29.57ml, or one ounce of VIBE) was found to have an ORAC score of 2,600.

Brunswick Laboratories (Wareham, MA) have conducted official testing of the antioxidant capacity of leading liquid nutritional supplements – they are the premier ORAC testing facility in the nation. It is an independent, third-party analytical laboratory and does not endorse products.

Brunswick Laboratories tested the following products for their hydrophilic **Oxygen Radical Absorbance Capacity (ORAC)**. The results are summarized, below:

ORAC Value Score Summary

Product	ORAC Score/oz. (29.57 ml)	ORAC Score/Bottle (32 oz.)
Eniva Vibe™†	2,600	83,200
YL Berry Young Juice™†	1000	32,000
Xango Juice™‡	530	16,960
Goji Juice™†	380	12,160
Noni Juice†	165	5,280
Sea Silver™†	90	2,880

Notes:

† Test conducted on a single sample of unopened retail product

‡ Test conducted on more than one sample of unopened retail product

Measurable Differences

VIBE is different - more scientifically advanced as compared to other multi-nutrient supplements on the market today.

1. Facts with Integrity

Interpreting the labels of some multi-nutrient products is like trying to read a foreign language... you're just not sure what they're saying. Some companies do not even know the amounts of some ingredients in their products - they will tell you that - "*it varies from one batch to another*", or, "*there is really no way to know the true amounts.*" At Eniva, not only do we verify raw material sourcing and have a government inspected manufacturing facility, we provide a detailed listing of the consistent ingredients and their amounts in each **VIBE** bottle.

2. Scientific Balance

Eniva devotes a tremendous amount of research and development effort to its products. Ironically, the science of correct nutrient ratios and interactions is often overlooked by most nutritional manufacturers. At Eniva, the laws of chemistry and body balance have been respected. No ingredient is sourced, or technical process explored unless it is grounded in qualified, scientific principles. Volumes of research documents, clinical studies, and test results are reviewed by Eniva's Research & Development Team as new technologies are explored. **VIBE** truly incorporates the best of both science and nature.

3. Unique Ingredients

VIBE contains a high-dose of Green Tea and Aloe Vera Gel in each serving. These unique ingredients possess a multitude of health benefits well-known to the scientific community.*

4. High ORAC Score

Short for *Oxygen Radical Absorbance Capacity*, ORAC is an analysis that measures the total antioxidant power of foods and other substances. It indicates the amount of dangerous free radicals an antioxidant can "absorb" or neutralize. Scientific findings from the USDA suggest that eating plenty of high-ORAC fruits and vegetables may help slow the aging process in the body and brain. Eniva's **VIBE** has one of the highest ORAC scores on the market derived from natural fruits, vegetables, and botanical sources.

5. Class 10,000 Production

VIBE is formulated and produced within a Class 10,000 Clean Room Manufacturing Facility. This is the same type of environment where heart pacemakers and super-computer chips are manufactured. Eniva has complete control over environmental factors such as air quality, temperature, pressure, and other variables. **VIBE** goes through strict process controls and inspections to ensure both safety and efficacy.

VIBE™: The Scientific Foundation for Your Success

"The end result of the technology used in VIBE™ is an all-in-one liquid product UNMATCHED in anti-aging properties as documented in scientific reports, studies, and doctor-recommended publications."

Working together, Dr. Benjamin Baechler and the Eniva Research & Development Team have pioneered industry leading breakthroughs in anti-aging technology. The result is a superior delivery system for specific nutrient molecules critical to the functioning of nearly every cell in the human body.

With this technology, VIBE™ is the first liquid product able to provide FOUR potent and exclusive anti-aging blends in an ALL-IN-ONE formulation. Synergized together, these 4 blends represent the most potent and exclusive solution for individuals looking to manage and overcome the aging process. Each bottle of **VIBE™** incorporates innovative science and technology:

- Pharmaceutical certified ingredients
- ORAC rated antioxidant capacity
- Structured water technology (purified to USP 23 standards)
- Proprietary Vibrational Frequency™ blending techniques to safeguard molecule structures
- Trade Protected mineral/nutrient ionization and bioactivation technology based on the physiology of the human digestive system
- Human Matrix™ nutrient ratios that replicate natural ratios found within the body
- Synergistic blend of specialized anti-aging components

The VIBE™ formula begins with USP23 pharmaceutical grade water. The water molecules are then enhanced using Eniva's unique structured water process, called Negative Field Activation™ Next, Eniva's proprietary Solutomic™ and aqueous technologies are applied. These breakthrough processes engage various nutritional components and produce a superior water-soluble nutrient delivery system. Lastly, the composition and effectiveness of the solution are enhanced through the application of Vibrational Frequency™ Technology. The specialized processes and nutritional components incorporated into VIBE™ allow for superior nutrient assimilation and provide the foundation for lifelong vibrant living.*

People Have Been Searching For An Answer . . . and The Answer is VIBE™

- All-In-One Supplement
- Anti-Aging
- High ORAC Antioxidant Rating
- Comprehensive Nutrient Mix
- Fast Acting
- All Natural
- Great Tasting
- Affordable

- That Addresses Numerous Health Goals
- Supported by Science

- Convenient Bottle or Single- Serve Packets
- High Quality
- Produces Results!

Eniva, does all the research – they are the Formulator and the Manufacturer of the product – and has onsite Class 10,000 R&D laboratories

† Daily Value not established

Ingredients: Purified water, natural extracts and flavors (cranberry, raspberry, blueberry, blackberry, strawberry, cherry, carrot, elderberry, hibiscus, lemon, lime, apple, blackcurrant, oregano, chokeberry, grape, pumpkin, tomato, pomegranate, katemfe, wolfberry, stevia), natural beet sugar, magnesium (from magnesium malate, magnesium citrate, magnesium glycerophosphate, magnesium sulfate, magnesium chloride), citric acid, malic acid,

potassium (from potassium citrate, potassium chloride), green tea leaf extract, calcium (from calcium citrate, calcium malate, calcium chloride), ascorbic acid, l-proline, l-lysine, d-ribose, d-alpha-tocopherol acetate, aloe vera gel, guar gum, niacin, vitamin A palmitate, zinc (from zinc sulfate), l-carnitine fumarate, potassium sorbate and sodium benzoate (naturally protects freshness), d-calcium pantothenate, boron (from sodium borate), manganese (from manganese chloride), folic acid, riboflavin-5-phosphate, pyridoxine HCl, glucosamine HCl, copper (from copper sulfate), strontium (from strontium chloride), thiamin HCl, cholecalciferol, chromium (from chromium chloride), biotin, lecithin, CoQ10 (ubidecarenone), selenium (from selenium chloride), germanium (from germanium sesquioxide), vanadium (from vanadyl sulfate), cyanocobalamin.

No artificial colors or artificial flavors added

ADULT DIRECTIONS:

Take 1 Ounce Daily (2 Tablespoons).

Recommended: 1 Tbl in AM and 1 Tbl in PM

Children over 4 years: 1 1/2 tsp in AM and 1 1/2 tsp in PM

Refrigerate after opening. Product should be consumed within 40 days after opening.

Caution: Do not consume if tamper resistant seal is broken or missing. Keep cap tightly closed and out of reach of children UNDER THE AGE OF FOUR. First consult your physician before starting this or any new nutrient supplement program.

Vibe™ Single Serve Packets

1 oz. premier pack, ready for immediate use!

CONVENIENT

2" x 3," small enough to carry in your purse or briefcase

- No refrigeration needed
- Easy disposal
- Great for work, travel, the gym—anywhere you go
