

Epic Ultra

“The Wave of the Future”!!!

Epic Ultra is a 100% whole food complex (plant-based) nutritional supplement with proprietary ingredients and proprietary processing techniques. It works in perfect harmony with Mother Nature by observing all her laws ~ guaranteeing all nutrients will be absorbed at the cellular level. That is why Epic Ultra is, by design, a complete Basic Foundational Health Program.

What Is A Foundational Health Program?

A Foundational Health Program is the combination of ingredients that **BALANCES** the body chemistry, **CLEANSSES** vital organs, **PURIFIES** the blood and lymphatic system, **NOURISHES** the body at its cellular level, **OXYGENATES** the body's cells, **PROTECTS** the tissues and cells against toxins, and **STRENGTHENS** the immune system. For over 25 years, Medical Doctors, Osteopaths, Chiropractors and Naturopaths all agree that we must do those seven things in order to have optimum health. We live in a world that has environmental problems, from the air we breathe, the food we eat, to the water we drink. Our foods have become more and more deficient in vital nutrients because of depleted soils ([Source: Senate Document 264 1936](#)), chemical fertilization, and improper food preparation. Combined with the stresses of everyday life – environmental pollution, society, career, family and financial challenges – our need for Foundational Health is at an all-time high.

Is Epic Ultra Safe With Medications?

Yes – there are NO contraindications with any medications. In fact, Epic Ultra may help to offset some of the negative side effects of certain medications – such as Chemotherapy and Radiation. If it is OK for you to eat food while taking your medications, then you can take Epic Ultra.

Liquid Vitamins: “The Wave of the Future”

Chiropractic Economics

(March/April 1998 - Volume 40, Number 6)

“The doctor of the future will give no medicine, but will interest his patients in the care of the human frame, diet, and in the prevention of disease.”

~ Thomas A. Edison

Here is what a renowned health expert says about liquid nutritional supplements:

“Nutritional Health depends upon how well your body absorbs the nutrients it has. There's an old saying, ‘You are what you eat.’ We disagree with that. Rather, ‘You are what you absorb!’ My views on nutrition changed one day a few years ago when a patient came in and told me what happened when she had recently cleaned out and repaired her septic tank at home. She found hundreds of “undigested” vitamin pills, some still with the brand names readable.”

"I decided to do some research into this area, and found in Tacoma, WA, there were 250,000 pounds of undigested vitamin and mineral pills pulled out of the sewers every two months. In Salt Lake City, over 150 gallons of vitamin and mineral pills show up in their filters every month. WHY??? The reason is due to the high metallic content of these pills. Metallic minerals - like oyster shells, carbonates, oxides, and dolomites - have the consistency of crushed up rocks, which our bodies were not designed to digest."

~ Dr. David Friedman, DC, ND

The Physician's Desk Reference [page 1542] shows that vitamins and minerals in a pill form are only 10% to 20% absorbed by the body. That means for every \$100 you are spending on nutrients in this form, you are literally flushing about \$90 of it down the toilet. Because of this lack of absorption, companies must use mega doses of nutrients - which can cause an over-taxation on the kidneys. According to the National Advisory Board, 100 mg consumed in a tablet form translates to a minute, stabilized 8.3 mg concentration in the blood.

Liquid Nutritional Supplements and oral sprays offer a 98% absorption rate, because they bypass the digestive process and go directly in to the blood stream and into the cells within a matter of minutes. Not only are liquid nutrients more convenient, they also allow those with irritable bowel syndrome, hiatal hernias and diverticulitis to take nutrients which may have irritated them in a pill or capsule form. Epic Ultra is a great tasting liquid nutritional that is very gentle and kind to your body systems.

Our bodies consist of approximately 70% water ~ NOT just any ordinary water ~ but salt water ~ the same salts that exist in the ocean in almost the exact proportions. Both the ocean water and the water within us contains 80% Sodium, 4% Calcium, 4% Potassium, and 12% Sulfur. Unlike minerals from the ground, nutrients from the sea are recognized by our cell receptors and are allowed access into our cells.

Colloidal Silver is contained in Epic Ultra, and world-wide research has shown over the past 25 years that no other nutrient, herb, or drug (prescription, or over-the-counter) is as safe and effective against all known forms of unfriendly bacteria, virus and fungus. Colloidal Silver has been used in the treatment of over 650 diseases.

The Earth's atmosphere once contained 40% oxygen, but today the air we breathe only contains 16% to 19% oxygen. That is only *ONE-HALF* the amount that our body was designed to need! *Many renowned medical researchers have produced evidence correlating a lack of oxygen to virtually all diseases.* In 1905 very few people had cancer - the oxygen level at that time is estimated at about 30%. In the 1940's the oxygen in our atmosphere measured 25%, and one out of twenty Americans had cancer. Today, one-third of Americans have cancer, and within the next 5-10 years it has been estimated that 50% of our population will have some form of cancer.

"The growth of cancer cells is initiated by a relative lack of oxygen. Cancer cannot live and survive in an oxygen-rich environment."

~ Dr. Otto Warburg

Oxygen is the key element to good health and is needed to help assimilate every nutrient known to man. *"In all serious diseases we find a low oxygen state . . . Low oxygen in the body is a sure indicator for disease . . . Hypoxia, or a lack of oxygen in the tissues, is the fundamental cause of all degenerative disease."*

~ Dr. Steven Levine

Diet has a direct correlation to your oxygen content. For example, unlike vegetables, "junk food" is very low in oxygen and high in preservatives. Eating "junk food" makes the body use up its valuable oxygen reserves to oxidize these preservatives. It is impossible to change the atmosphere, but with Epic Ultra there is finally a way we can increase the oxygen content in our body. Not only does each bottle of Epic Ultra contain all the nutrients needed on a daily basis, it also contains 40% oxygen - the same percentage of oxygen that existed in the Earth's atmosphere many years ago.
