

"Why You Need Personal EMF and Stress Protection at Work, Home, and Play – 24 Hours a Day"

Scientists estimate that our daily exposure to EMF radiation is 100 Million Times higher than it was in our Grandparents' time.

"Electromagnetic pollution (EMF) may be the most significant form of pollution human activity has produced in this century, all the more dangerous because it is invisible and insensible."

~ **Andrew Weil**, M.D., author of *Spontaneous Healing* and *8 Weeks to Optimum Health*

Dear Concerned Citizen,

It is everywhere, almost as common as the air you breathe. If you're like the typical person living in modern society, there is not a time during your typical day when you are not exposed to electromagnetic fields (EMF). This type of environment has never existed in the history of human civilization before. What consequence does this type of invisible presence have on your ability to fully function as an organic human being?

With the explosion in Radio and TV broadcasting stations, radio telephone networks, cordless phones and cell phones, Cell Phone Microwave towers, the density of radio waves and microwaves around you is now many millions of times higher than natural levels. The same applies to Extreme Low Frequency (ELF) fields produced by the dozens of electrical appliances in households in the industrialized world and the power lines feeding those devices. Industrialized countries in North America, Western Europe and China emit so much ELF energy that it can be sensed by satellites in space.

[HealthStyles4U - 2008](#)

The Revolutionary Pendant Developed with Stanford University Scientists Protects You from Physical, Mental, and Environmental (EMF) Stress *Anywhere* You Go

Quick Facts on the New Q-Link® Pendant

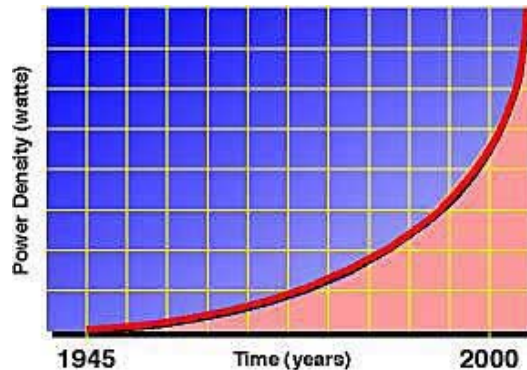

- Reduces the effects of EMF radiation
- Strengthens your resilience to the effects of stress
- Increases your energy and stamina
- Reduces the symptoms of fatigue
- Relieves the symptoms of jet lag
- Enhances mental performance and alertness
- Backed by 25 years of [Research](#) in leading universities
- Featured on TV and the media
- Sleek & fashionable design
- Worn by famous [celebrities](#) such as Anthony Robbins, Madonna, Jerry Hall, etc., doctors
- [Olympic Athletes](#) and people from all walks of life

Q-Link® is *the most advanced personal energy system available today!*

MORE ENERGY • LESS STRESS • GREATER FOCUS • IMPROVED WELL-BEING

Health experts agree that **EMF is an invisible co-factor in increasing your daily stress levels**, compounding your adrenal loads and significantly risking your immune function and your body's natural ability to cope and repair.

Exponential growth in background EMF radiation.

Research shows that these fields have a **significant disruptive effect** on the natural energy levels of your body. They magnify your body's "flight or fight" responses, compounding your adrenal loads from other stressors and significantly reducing your ability to cope effectively. The unhealthy levels of EMF pollution to which we are now exposed every day, have been proven to:

- disrupt your natural energy levels
- trigger stress responses
- impair your body's natural ability to heal.
- adds stress to your already taxed system – compound stress.
- contribute to your energy depletion and fatigue.

And the long-term effects are even worse...

Dr. Neil Cherry, a biophysicist and an elected official in New Zealand, said that studies indicate that non-ionizing radiation causes everything from cancer in lab rats to neurological changes in humans. Dr. Cherry stated that human beings are very good conductors of microwave transmitted signals. Living organisms are themselves electromagnetic instruments of great sensitivity that can support a variety of electrical vibrations; these can be interfered with by external radiation - both at microwave and very much lower (ELF) frequencies - in a number of ways, from which adverse health effects can follow. In fact, numerous studies from leading scientists have linked long-term EMF exposure to increased risks for . . .

- **heart disease**
- **cancer**
- **leukemia**
- **brain tumor**
- **Alzheimer's disease**
- **Parkinson's disease**
- **depression and suicide**
- **fatigue**
- **asthma**

In one study, Charles Graham, an experimental physiologist at the Midwest Research Institute (MRI) in Kansas City, Mo., says that magnetic fields can alter two hormones that affect cancer risk – **estrogen** and **testosterone**. Overnight exposure of women to elevated levels of EMFs in the laboratory significantly increased estrogen. Studies have shown that high levels of estrogen over many years can increase a woman's risk of getting **breast cancer**. In men, the EMF exposure reduced levels of testosterone--a hormone drop that has been linked to **testicular and prostate cancers**.

Graham's studies have also shown that **intermittent exposures to EMFs have an effect**, a situation that emulates real-world exposures--which can vary from second to second in frequency, intensity, and waveform, depending on their source and an individual's distance from it.

Martin Halper, the EPA's Director of Analysis and Support says, *"I have never seen a set of epidemiological studies that remotely approached the weight of evidence that we're seeing with EMFs."*

The World Health Organization (WHO) Thinks You're at Risk

*"The World Health Organization (WHO) takes seriously the concerns raised by reports about possible health effects from exposure to electromagnetic fields (EMF). Cancer, changes in behaviour, memory loss, Parkinson and Alzheimer's diseases, and many other diseases have been suggested as resulting from exposure to EMF. Everyone in the world is now exposed to a complex mix of EMF frequencies in the range 0-300 GHz. **EMF has become one of the most pervasive environmental influences and exposure levels at many frequencies are increasing significantly** as the technological revolution continues unabated and new applications using different parts of the spectrum are found."*
- World Health Organization, Geneva, Switzerland

The EMF problem has been categorized as a **new form of pollution as consequential as air and water pollution**. It has also been **likened to the hazards of asbestos and cigarette smoking**. Because the harmful effects of exposure to EMF appear to take place slowly over time, the long-term effects of damage inflicted today won't be known for years to come. In terms of its snowballing health effects, EMF exposure been compared to the **slow process of lead poisoning**.

What can you do? There's just no escaping exposure, oftentimes at dangerous levels, to EMF. At home, work or anywhere in between, you are at risk. Since EMFs are everywhere, what can you do to reduce the risks?

Introducing... the Q-Link Pendant

**Your Own Personal EMF and Stress Protection
24 Hours a Day, 7 days a Week**

The amazing **Q-Link** uses the proprietary **Sympathetic Resonance Technology (SRT)** to **stabilize and strengthen the human bio-field**, which is negatively impacted by stress-inducing EMF and other environmental issues that force the body to be out of balance. The Q-Link alleviates the discord in your body by reducing the effects of EMF, increasing your energy and stamina, and strengthening your resilience to stress.

"As a speaker, I'm often onstage for 12 hours or more a day. Three-and-a-half years ago, Dr. Herb Ross found that the electromagnetic fields (EMF) emitted by my wireless headset were creating a physical weakness in my body. When I began utilizing the Q-Link, I noticed an immediate recovery in my muscle strength and a counteracting of the negative effects from the headset's low frequency waves. I have certainly benefited from the Q-Link."

- Anthony Robbins, author of 'Awaken the Giant Within' and other books. Regarded as America's top personal coach and trainer for personal development

Today's world requires strengthened mental, emotional and physical resilience. Both independent tests and Q-Link users report that this life-enhancing product provides this resilience.

Benefits of wearing the [Q-Link](#) Pendant include:

- Reduces the effects of EMF radiation
- **Strengthens your resilience to the effects of stress**
- Increases your energy and stamina
- **Reduces the symptoms of fatigue**
- Relieves the symptoms of jet lag
- **Enhances your mental performance and alertness**

Your body is a complex and highly sophisticated organism. It needs constant fine-tuning in stress-filled environments. At your best you resonate with health--almost literally, every part of your being pulses in harmony. Conversely when your resonances are disturbed or interrupted, your body begins to break down. You become vulnerable to a variety of ailments. Not only are you not functioning effectively, but also your defense mechanisms are in decline.

In biological terms, the [Q-Link](#) restores your harmonies by helping to regulate the 'homeostasis' of your body. 'Homeostasis' is the condition of equilibrium, the 'dynamic range or balance' where your body's multiple systems operate together and resonate at their optimum.

"I started wearing the **Q-Link** in Mid August, 2004. The first night I wore the product I slept right through the night. I'm sleeping better, and have noticeably less stress and increased vitality. However, the best part for me is I took a life insurance physical and found my blood pressure had gone down 20% over a 3 week period!"

- **R.G., age 59, Rancho Santa Fe, CA**

"Since I use the computer a lot and sit in front of the screen most of the day, I found I was getting fatigued, prior to wearing the Q-Link Pendant. Now I seem to have a lot more energy after spending time before the computer screen and my eyes are not as tired the next day. Electromagnetic and electronic technology is all around us today, I wear the Q-Link everywhere. It has been a tremendous boost to my productivity as you can imagine. Thanks for all your help and best wishes."

- **Peter Sun, Peter Sun Marketing and Training**

Let's Look at Some More Reasons Why the Q-Link® Should be Part of Your Everyday Wear

How Much EMF Are You Exposed to in Your Own Home?

Electromagnetic fields have **ELECTRIC** and **MAGNETIC** field components. While electric fields from most devices primarily affect the surface of the body, and do not penetrate to the internal organs, **magnetic fields penetrate deeply into your cells, tissues, and vital organs. They can even induce electrical currents inside the body.**

The chart above summarizes data from a study by the *Electric Power Research Institute (EPRI)* in which spot measurements of magnetic fields were made in the center of rooms in 992 homes throughout the United States. When the average of measurements from all the rooms in the house was calculated (the all-room mean magnetic field), **about half of the houses studied had magnetic field measurements that exceed the proposed safety standard for the home!** (Magnetic fields are measured in milliGaus, or mG, and the proposed safety standard for normal ambient levels of magnetic fields in the home is 1 mG).

Some of the homes even have significantly higher measurements, with a few getting to as high as 6.6 mG! (See chart) *These measurements were made away from electrical appliances and reflect primarily the fields from household wiring and outside power lines.*

The chart also shows averages of measurements taken throughout the homes, not the single highest measurement found in the home. This means some areas of the home have higher measurements, some areas less. As you can see, some of the homes have significantly high mean magnetic field measurements--

Close to half of American homes studied have high levels of background magnetic fields. More than 20% are dangerously high!

Consistent exposure to EMF levels that exceed the proposed standard puts you at risk for developing health problems which can range from headaches, fatigue, and dizziness to skin rashes, miscarriage, leukemia, and cancer. One study (Ahlbom & Feychting, 1993) reported that **at 2 mG and above, exposed children were 2.7 times as likely to develop cancer as unexposed children**, and at **3 mG and above, the odds rose to 3.8 times as likely!** In fact, **numerous court cases where plaintiffs claim to have been injured by EMFs are now in progress.**

EMFs from Household Appliances

Even where domestic background is less than 1 mG as shown in the above chart, personal exposure can still be quite hazardous since appliances can induce EMFs of 30 mG and higher. Magnetic fields from individual appliances can vary considerably, depending on the way they were designed and manufactured. One brand of toaster, for example, may generate a much stronger magnetic field than another. It is important to keep in mind that a typical American home already has a background magnetic field coming from transformers, wiring inside the house walls, excess current carried by plumbing, and powerlines or underground power cables. The actual strength of the field at a given place in a room depends upon the number and kinds of sources, how far away they are, and how many are operating at one time. **Walls generally do not block magnetic fields.** An electrical appliance located near a wall extends its magnetic field into the room on the other side of the wall as well.

ELF field strengths drop off quickly with distance, and exposures to many EMF sources may be brief. However, **research has indicated that even weak and short exposures have an effect, the effects seem to be cumulative, and multiple on/off exposures may induce stronger effects than continuous exposures.** For example, in a study conducted by Kaiser Foundation Research Institute in Oakland, California, women in their first 10 weeks of pregnancy exposed to *peak EMF* levels greater

than 14 mG, such as from vacuum cleaners, hair dryers, blenders and can openers, were nearly twice as likely to have miscarriages than women who had not been exposed to such strong fields.

How Much EMF Do You Personally Get Exposed to in a Day?

Example of data collected with a personal exposure meter.
Recommended safety standard is 1 mG.

In the above example, the magnetic field was measured every 1.5 seconds over a period of 24 hours. Keeping in mind the 1 mG proposed safety standard, you can see that this person was exposed a considerable number of times to peak EMF values much, much higher than that.

How significant are such spikes or peak exposures? In a study conducted by Kaiser Foundation Research Institute in Oakland, California, pregnant women exposed to peak EMF levels greater than 14 mG were nearly twice as likely to have miscarriages. As the above chart example shows, the average individual experiences actual peak exposures as high as 20 mG or more in any given 24-hour period. **It bears repeating here that research has shown that even weak and short exposures have an effect, the effects seem to be cumulative, and multiple on/off exposures may induce stronger effects than continuous exposures.**

Several studies have used personal exposure meters to measure field exposure in different environments. These studies tend to show that appliances and building wiring contribute to the magnetic field exposure that most people receive while at home. People living close to high voltage power lines tend to have higher overall field exposures.

According to a study commissioned by the U.S. government as part of the EMF Research and Public Information Dissemination (EMF RAPID) Program, 43.6% of the U.S. population have a **mean magnetic field exposure of more than 1 mG** in a given 24-hour period. 14.3% are exposed to magnetic fields that average **more than 2 mG**. 2.4% had exposures exceeding 5 mG, and 0.4%

had exposures exceeding 10 mG. The last value indicates that about 1 million people in the US have an average 24 hour exposure greater than 10 milligauss.

Bear in mind that these are mean or average exposures. This means that they are being subjected to **peak EMF values** much higher than that. The greater the average exposure, the more actual peak exposures there are. **Peak exposures at a single point in time are often considerably higher due to peoples' exposures to appliances, wiring, and other sources.** About 0.5% of the population had an estimated maximum (peak) exposure to magnetic fields of 1000 mG!

Most Commercial Buildings Have Background Magnetic Fields Higher than Recommended Safe Levels

Virtually all commercial buildings will have areas with elevated magnetic fields. These are unavoidable, caused by current-carrying devices including transformers, electric service panels and conduit. **Most commercial buildings have background fields in the range of 2-4 mG** (well above the 1 mG recommended limit), but also have "hotspots" near these current sources where the magnetic fields are much higher.

If you look at the above Personal Magnetic Field Exposure chart again, you will notice that more peak EMF exposures occur at work and between home and work. In addition to the background EMFs in commercial buildings, additional exposures come from common office equipment, such as computers, copiers, fax machines, fluorescent lights, and many others.

Epidemiological studies in Sweden by Maria Feychting showed that individuals exposed to high magnetic fields at home and at work had 3.7 times the risk of developing leukemia compared to those not exposed. Also, 2 recent research reports have identified elevated risks of breast cancer among women working in jobs with presumed higher than average exposure to EMFs.

As you can see, there's just no escaping electropollution. Whether at home, work, school or anywhere in between, you are bombarded with varying degrees of exposure. Right now, as you read this, EMFs from your monitor, computer tower, cordless phone, electrical wiring running through your house (or office) walls, etc. act as invasive foreign toxins that your body doesn't recognize and thus create stress. And health experts agree that cumulative stress, through repeated exposures, could weaken your body's ability to repair itself.

Scientific Research Tests Confirm the Powerful Q-Link Works to Reverse Environmental Stress!

"The Q-Link is a technology that amplifies and clarifies the body's energies. By reducing the noise in any energy field, this technology **strengthens and purifies the body's own energies**. This technology has been scientifically demonstrated to enhance the body's ability to protect itself from harmful environmental radiation, and thus it helps to remove harmful influences on the organism's health and well being. This technology therefore removes some of the blocks to inner transformation to higher and healthier states of being."

- **Ken Wilber**, *President of Integral Institute, Boulder, CO, Author of A Brief History of Everything and 16 other books on consciousness and integral theory and practice.*

The **Q-Link** helps regulate homeostasis and boosts resistance to the effects of stress. Studies conducted at the University of California at Irvine, Imperial College at London, University of Vienna's Institute of Cancer, University of Vienna's Institute of Environmental Health, and independent clinics have persuaded researchers of the Q-Link's benefits.

► **Blood Quality Improves with Q-Link!**

Stress can deteriorate the condition of blood. Two different studies by microbiologist Robert Young strongly suggest that **as the Q-Link increases resistance to stress, blood quality improves.**

The conclusions of this remarkable study support the experiences of Q-Link users who consistently report enhanced abilities to cope with physical, mental, emotional and environmental stress. This increased stress resistance strongly correlates to **improved focus and performance.**

"My study on live and dried blood cells involved 14 individuals. In 100% of the test group, the Q-Link Pendant demonstrated the ability to provide a favorable context for normal organization of blood cells which were visually showing multiple negative conditions. I perceive these negative conditions are attributable to years of stressful lifestyles.

"After wearing the Q-Link Pendant for only 72 hours, each participant showed a significant improvement in the quality of their blood.

"The blood of the test group wearing the Q-Link Pendant showed a visual, normal blood profile that I see in only 1 out of every 10,000 people. In my opinion, any person whose blood is improved to this degree will significantly improve their performance and quality of life."

- Robert O. Young, Ph.D., D.Sc. Microbiologist

Before: Blood cells before Q-Link is worn show less resistance to stress.

After wearing Q-Link for 72 hours: Blood cells show higher resistance to stress.

"The Q-Link works, but that is not nearly as important as why it works - just like an apple falling is not nearly as important as why it falls. The operating principles and theories behind the Q-Link are so innovative that they have the potential to revolutionize our understanding of the human being - and the Universe. I have been impressed by the Q-Link because it has helped me balance my physical, emotional, and cognitive energies. **I feel a greater clarity and well being in my mind, and my doctor has detected the same clarity and well being in my blood.** But more importantly, I'm impressed because the Q-Link

has opened the most fascinating exploration on the nature of reality I've ever undertaken. I sincerely hope that more people find the Q-Link a key to health and development."

- Alfredo Kofman, PhD, Former Professor and Teacher of the Year at MIT Sloan School of Management, Author of The Fifth Discipline Handbook and many other books on Management Science, Organizational Behavior and Economics. Top consultant to Chrysler, Shell Oil, General Motors, EDS, Intel, Phillips and other corporations.

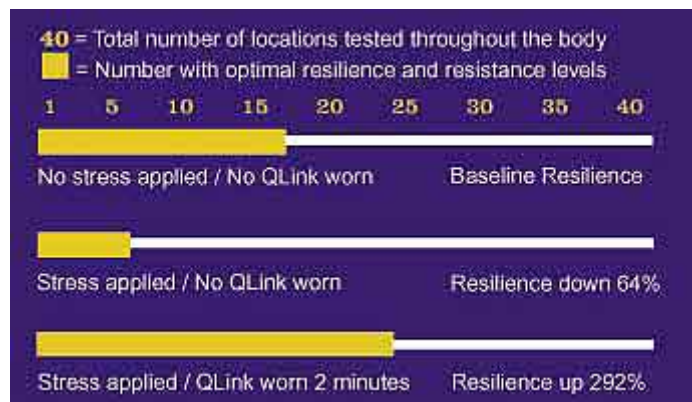

"After Live & Dry Blood Testing, testing both humans and horses, I have yet to see the **Q-Link** fail at producing positive changes in blood marker parameters. By improving white blood cell function and endocrine system homeostasis I have witnessed my clients energy levels lift, their headaches disappear and physical and mental stress relieved."

**- Christopher Manton - Nutritional Biochemist/Medical Technologist
B.App.Sc.M.Nut & Diet. Dip Ass, Nat, Member CMA**

► Stress Resistance Increases with Q-Link!

Independent clinical research was carried out by Dr. Tykeeta Reye and verified by Michael Kundi, PhD at the University of Vienna. This stress study measured test subjects for resistance to stress with and without the Q-Link.

"After wearing the Q-Link for 2 minutes, the number of tested body locations with **optimal stress resistance increased by 292%.**"

Not only does the Q-Link dramatically increase resilience in the presence of applied stress, it even surpasses the baseline (where no stress was applied) by 41%!

► EEG Brainwaves and the Q-Link

The Q-Link is the result of over 15 years of research involving scientists, engineers and clinicians. The effectiveness of Q-Link's Sympathetic Resonance Technology (SRT) has been independently documented by multiple brainwave studies at major universities and a 34-page scientific research paper published in a prestigious peer-reviewed health journal.

The independent university research on Q-Link technology demonstrates increased stress resistance, enhanced cellular and brainwave performance by reinforcing key components of the human biofield.

A double blind **EEG Brain Wave study** by Norman Shealy, MD, PhD and William Tiller, PhD demonstrated the **Q-Link's ability to be effective under the stress of electromagnetic fields.** The study indicated the following: "Prior to these tests using the Q-Link, there had been no known approach for individuals that allowed them to resist the effects of EMF on brain functions. These tests show the Q-Link's capability for helping to regulate these effects."

Why Q-Link Works For You

The Science and Technology Behind the Breakthrough

How does something that looks so simple--a lightweight pendant--possibly create such significant user benefits and earn the praise of science and the constant applause of national media?

The answer lies at the heart of every Q-Link--a scientific breakthrough called **Sympathetic Resonance Technology (SRT™)**--developed over a decade of research, partly in collaboration with scientists in Stanford University, the University of California, Irvine, many healthcare professionals and the pioneering research team at Clarus.

THE BIOFIELD--the key to energy, wellness and balance

In 1994, scientists at the U.S. National Institutes of Health (NIH) established the term "human biofield" to describe the external field of weak, extremely complex electrical energy that surrounds your body. Among other vital functions, the "biofield" appears to play an essential role in determining how successfully we adapt to, or cope with, the effects of everyday stress.

Physical, emotional, mental and environmental stress can rupture the integrity of your biofield. The weaker your biofield, the less able it is to resist additional stress.

When this happens, your life becomes a vicious cycle of "noise" and "static" which seriously compromises your ability to function. Many authorities, such as the Harvard Medical School, link chronic stress to a host of adverse health issues.

Researchers believe that when this external biofield is highly organized and balanced, every part of you functions better. As your whole system becomes more balanced and efficient, you become more resistant to many forms of stress.

Strengthening/Enhancing the **BIOFIELD**

Think of a resilient biofield as your protective force in a stressed-out world. The Q-Link works like a set of tuning forks that continuously "tune and reinforce" the key frequencies of the human biofield, so they are strengthened. The user normally experiences this as more energy, higher resistance to stress, more focus, and enhanced mental and physical performance.

When you wear the Q-Link, you are strengthening your biofield against stress caused by background EMFs existing inside your home and work, as well as from the higher exposures that come from your cell phones, computers, household appliances, automobiles, public transportation, commercial and office buildings, and office and industrial equipment. The Q-Link also strengthens you against other stress factors that you face on a daily basis...

"The SRT in the Q-Link Pendant protects against stress from a variety of types of stressors including: **EMF Fields and possibly also chemical toxins**, and helps maintain a homeodynamic balance."
- **Dr. Beverly Rubik, Ph.D.**, *The Journal of Alternative and Complementary Medicine*

"Clarus products provide a key to refining nearly every aspect of life, from jet lag to stress and chronic fatigue."
- **Peter Clecak, Ph.D.**, *Professor of Psychology at the University of California at Irvine*

The Q-Link Will Help Improve Your Game!

PERFORMANCE ON THE PGA TOUR

"The Q-Link® has helped me keep maintain focus and lower my scores. The Q-Link® is definitely gonna help the amateur keep their focus which in turn will help lower their scores."

- Ted Purdy, PGA Tour winner

A two month study of players on the regular PGA Tour in 1999 was conducted to determine if use of the Q-Link would result in lower golf scores. Known users of the Q-Link were identified, confirmed, and a statistical analysis of their cuts made was conducted. The percentage of cuts made by each player in the five months prior to wearing the Q-Link was calculated for each player, and then again for the two month period wearing the Q-Link. **An astounding 77% of known Q-Link users made a higher percentage of cuts with the Q-Link!**

The October, 2000 testing of the Q-Link at the SBC Senior Tour Classic resulted in **11 of the top 15** tournament contestants having taken part in our study, including the top three finishers. This group of 11 represented 14% of the field, yet they took home 53% of the prize money.

In referring first to the SBC Classic, and then the Senior Tour Championship, **The Golf Channel** reported that *"For the record, new Q-Link wearers finished 1st, 2nd, 3rd, and one tied for 5th, and two ties for 7th in Los Angeles. And the next week at the tour championship in Myrtle Beach, Q-Link wearers finished 2nd, with three more Q-Link wearers finished tied for 3rd place. As reporters, we don't of course endorse products, we only report facts. And the facts here, are what we report."*

Q-Link — Sports Equipment For The Mental Game

If you desire high performance, you will love the Q-Link®. Although not originally intended for the sports market, the Q-Link® has naturally developed a devoted following with those who perform at the upper limits, most particularly the golfers. Golf is a delicate and challenging game. Even minor twitches can cause a missed putt, a shanked wedge, or an errant drive. That's why professional and amateur golfers the world over are flocking to the Q-Link®: it helps them stay relaxed, focused, and confident throughout their round, giving them a smoother stroke, calmer nerves, and a competitive edge.

"The Q-Link® has helped me with my energy and focus on and off the course and it played a significant role in my victory at the U.S. Open."

- **Birdie Kim, LPGA 2005 U.S. Women Open Champion**

"When I started wearing the Q-Link® in 2001 it was the best streak of playing golf I have ever had! I feel calmer, less nervous and less anxious, which is a good thing in professional golf. Q-Link® helps me to be very consistent."

- **Mark Calcavecchia, 2003 PGA Tour, Multiple Winner With Q-Link®**

"The QLink is a powerful tool for golfers, enhancing performance under the stress of competition. It reduces mental 'chatter' and distraction, making it easier to focus, concentrate, and ease into the settled, even flow of being in the Zone. Don't tee off without it!"

- **Dr. Joseph Parent, Mental Game/Performance Enhancement Coach for PGA, LPGA, Tour Professionals, Club Pros and top amateurs. Featured on CNN Headline News.**

Experience the difference the Q-Link makes. Wear the Q-Link day and night to discover a new sense of calm, an increase in energetic harmonies, in homeostasis, in your sense of balance and wellbeing.

More Golf Results

An MSA Meridian Stress Assessment test at the September, 2000 PGA International Show of over 200 participants was done by Steve McGregor of BioMeridian International, Inc. McGregor stated, "I've conducted thousands of tests using the BioMeridian system in every industry and I've never seen anything like the QLink results. **Whether the QLink was worn for two minutes or two days, every subject exhibited a dramatic increase in measurable energy, a strengthened resistance to the effects of stress, and a shift to their ideal performance state.**"

The same MSA test was repeated on the practice tee of the SBC Senior Classic in LA in October, 2000 using 60% of the field of professionals. Every player tested showed an improvement with the QLink, and the vast majority showed a huge improvement. With the QLink, players were nearly five times more likely to reach the ideal target zone, than without it, when measured on the FDA approved BioMeridian system.

Whether You Need Protection from EMF or From Any Environmental, Physical, Mental or Emotional Stress-- At Work, Home or Play – the Q-Link Will Serve as Your Personal "Bioshield" All Day Long

A decade of research has found the **Q-Link** pendant **very quickly amplifies healthy energy states** — and decreases energy drains caused by a wide variety of stressors. It is the premier tool for strengthening you against direct and ambient sources of EMF, including EMF from computers, cell phones and electrical appliances.

Tens of thousands of people – ranging from professional athletes to home business owners--testify to the calm accomplished by wearing the Q-Link, the increased focus and sense of security. But the most important testimony is the one we don't have yet... the testimony that will be reported by your own body. Learn what your own body has to tell you about Q-Link . . . today!

The Q-Link® does not prevent cancer, or cure any medical ailment. The Q-Link® is not a medical device and is not intended to prevent, cure, mitigate, treat or diagnose any disease. There are many factors that contribute to a person's health and well-being or lack thereof--genetics, environment, lifestyle, diet, etc.

What the Q-Link® does do – [as shown through scientific research](#) – is helps to strengthen the immune system against the onslaught of stress – whether it is environmental, psychological or emotional – and induces a more coherent, highly organized and balanced biofield. You will normally experience this, as many [users have reported](#), as **more energy, higher resistance to stress, more focus, and enhanced mental and physical performance.**

Many doctors or physicians also generally agree that if you can increase your resistance to stress, or your ability to manage stress, then the ability to self-heal may also be enhanced and in some cases the healing process can be accelerated.
